

# GROW more with us.

SPEC SHEET

## WIDESPAN GROW FEATURES & BENEFITS

Spacesaver's durable and versatile Widespan GROW shelving provides long-term support for plants, pots, supplies, and accessories to help create an optimal indoor grow environment. Unlike traditional racking, Widespan GROW is designed for strength and ultimate flexibility by having welded horizontal bracing instead of diagonal bracing. This feature allows for other horticulture accessories such as lighting, HVAC and irrigation to be easily integrated within the GROW System. Widespan GROW shelving provides sturdy support in static applications or in high-density mobile applications through integration with Spacesaver's ActivRAC® Mobilized Storage Systems.

### WELDED UPRIGHTS

**MATERIAL** 14-gauge heavy-duty steel; 12-gauge on some beam options

**COLORS AVAILABLE** GROW White powder coat paint is antimicrobial and highly reflective or any of Spacesaver's 32 (standard, custom and metallic) powder coat paint colors
